

UNLOCK THE POWER OF YOUR DATA WITH AI

**DATA****INFORMATION****KNOWLEDGE****ACTIONABLE
KNOWLEDGE**

DOCEO AI SOLUTIONS

WHY?

School districts are overloaded with data but lack clear insight. Information is scattered across systems and departments, making it hard to get a complete view.

This disconnect means critical issues like student disengagement, equity gaps, learning difficulties, staff retentions go undetected until they escalate. At the same time, valuable opportunities to support students, staff and improve outcomes are missed.

OUR SOLUTIONS

DOCEO AI turns disconnected data into **proactive insight**. By unifying all data sources into one connected environment, our platform removes complexity. With machine learning and data visualization, DOCEO AI **predicts** challenges, reveals hidden trends, and delivers **targeted support** empowering educators, students, parents, and administrators to act early and effectively.

Clario is a **secure, role-aware** chat platform that delivers clear, relevant, and **verifiable** answers to everyday questions. School districts can move from reactive fixes to proactive, strategic decisions that drive measurable progress.

HOW WE DO IT?

At the core of DOCEO AI is advanced AI technology designed for transparency and accessibility:

- **Predictive machine learning models** continuously analyze both historical and real-time data to forecast issues and surface opportunities. Each prediction includes the key drivers, enabling confident, informed decisions.
- **Large Language Models (LLMs) with Retrieval-Augmented Generation (RAG)** allow users to ask questions in plain language and receive clear, contextually relevant answers whether about curriculum design, policy details, operational metrics, or student support needs.
